Experience

Accenture

Packaged App Development

October 2023 - Present

During my time at Accenture, I was part of the BTP RAP and BTP Integrations teams. In both teams, I worked using agile methodologies (Scrum), actively participating in sprints, reviews, and incremental releases. I was also responsible for researching tools aimed at improving team productivity and ways to integrate Artificial Intelligence to optimize tasks, automate processes, and improve efficiency in various development and integration activities.

- BTP RAP:
 - Fiori application development using the ABAP RESTful Application Programming Model (RAP).
 - Development of database queries for information management and service presentation.
- BTP Integraciones:
 - Design and maintenance of integrations between SAP and non-SAP systems using SAP Integration Suite.
 - Application of service-oriented architecture (SOA) principles.

Penta Consulting

Full-Stack Developer

October 2022 - May 2023

During my time at Penta Consulting, I was part of the development team responsible for managing and customizing Microsoft CRM for the company's clients.

- Frontend Development (JavaScript):
 - Customizing the user interface.
 - Fetch and Odata queries.
- Backend Development (C#):
 - Database query.
 - Plugin Development.
 - Desarrollo de Consolas.
